USB-RS485-RJ45 MKII

Product Description

Now featuring a durable metal chassis and offering both USB-C and USB-A connectivity, the MKII version is built for long-term performance in demanding, mission-critical environments. Whether you’re deploying our active line array elements or managing stage setups with the latest WDG-A series floor monitors with our PRO=LINK software, the MKII ensures fast, reliable control via RS485.
This improved accessory replaces the original USB-RS485-RJ45. The MKII delivers the same trusted functionality but with enhanced build quality and flexibility.
Compact, versatile, and engineered for reliability — the USB-RS485-RJ45 MKII is ready for your next show or installation.
